

Sustainable Network for agrofood loss and waste prevention, management, quantification and valorisation (FoodWaStop) CA22134

**WG5. Cross-cutting strategies and smart systems for food management, *Leader: Sandro FRATI***

<b>WG</b>	<b>Title</b>	<b>Leader</b>	<b>Number of members</b>
WG5	Cross-cutting strategies and smart systems for food management	Sandro Frati	222

WG5 aims to consider the **cross-cutting nature of the FLW challenge** by connecting FoodWaStop actions to the social-economic aspects, and the public health and technological contexts. Ensuring that the FoodWaStop initiative is connected to the world is crucial to reduce FLW.

**Challenge 5:** *How can smart solution play a key role at all levels to reduce FLW?* Integration of the main FLW players, in which Mediterranean Countries and experts from COST and non-COST Countries will be included to establish smart solution

**WG5 D5.1.** Assessment of regulatory frameworks dealing with FLW (M36)

**WG5 D5.2.** Protocol for smart technologies for optimisation of processing, transportation, and distribution of F&Vs (M36)

**WG5 D5.3.** Protocol for packaging using biodegradable materials (M48)

**WG5 D5.4.** Guidance documents to support policy makers (M48)
